Poster Prints in a Matt Finish

Our heavier-weight, white, premium matte paper has a natural, smooth uncoated finish that feels luxurious to the touch. The 200 gsm/ 80 lb paper weight makes it durable. We use FSC-certified paper or equivalent certifications depending on regional availability. It's better for the people and the planet. Each poster is shipped in robust packaging, ensuring it arrives safe and secure.

Framed Pictures in a Matt Finish

Our ready-to-hang wooden framed posters are sturdy, durable, and ready to hang instantly! The frames are made from pine and come in 4 colors: black, white, natural wood, and dark brown wood. They are 20-25mm /0.79"-0.98" thick and 10-14mm /0.4"-0.6" wide, providing the perfect balance of durability and style. To keep your print looking its best, we use shatterproof, transparent plexiglass to protect it from damage. We include hanging hardware with every order.

Thick Textured Canvas

We use responsibly sourced wood for stretcher bars to make our canvas prints, ensuring a long-lasting and high-quality product. We use coated fabric, a blend of cotton and polyester, for our canvas substrate. With a weight of approximately 300-350gsm/110-130lb cover and a thickness of 350-400 microns, this gives you a sturdy and durable product. We also include a hanging kit, for easy installation.

Digital Files

JPEG images come in sizes ranging from 5MB to 10MB, suitable for full-resolution prints at 18x12 inches. TIFF images are sized between 50MB and 100MB, ideal for full-resolution prints at 30x20 inches. The file format choice, whether JPEG or TIFF, depends on the size of the negative.
